

FOAMIN'TEA

FOAMIN'TEA is a plant powder with surfactant assets. 100% natural, FOAMIN'TEA is a by-product of the tea seeds oil extraction.

- FOAMING
- CLEANSING
- ANTIMICROBIAL

Thanks to its properties, FOAMIN'TEA can replace an usual surfactant to create a generous foaming effect, with cleaning and antimicrobial actions on cosmetic product formulation.

Extraction process

Oil is processed by a cold press of *Camellia oleifera* seeds. Saponins residue of camelia seed cake are extracted (hydroalcoholic extraction + atomisation) to obtain a dry extract that contains more than 60% of saponins.

Uses

FOAMIN'TEA is the ideal anionic surfactant to be used in many cosmetic formulations :

- Dry cleanser
- Micellar water
- Shower gel
- Shampoo
- Cleaning paste
- Toothpaste

INCI : *Camellia oleifera* seed extract
Appearance : powder – beige
Saponin content : >60%
Shelf-life : 36 months
Package : 10kg

100% NATURAL – 100% PLANT ORIGIN – 100% UPCYCLED – COSMOS APPROVED
