

NATURAL COLOURING PLANTS

Our Natural Colouring Plants are extracts and pigments obtained from plants mostly grown in France. These products are suitable to be used in skincare and hygiene products, hair products, soaps, make-up products and detergents.

➤ Soluble dye plant extracts

A range of dyes recommended for skin care and hygiene products (gels, shampoos, aqueous emulsions).

- ✓ In aqueous, transparent formulations (gels, shampoos, liquid soaps, ...) : 0.1 to 0.5%
- ✓ In aqueous phase of emulsions : 1 to 3%
- ✓ In aqueous phase of solid soaps (cold or hot saponification) : 0.1 to 0.5%

➤ Insoluble natural pigments

A range of vegetable pigments, insoluble in water but dispersible in oil. Indicated for make-up products, oily emulsions and solid soaps.

- ✓ From 1 to 5% in the oily phase

➤ Natural pigmented oils

A range of 6 pre-dispersed pigments (20%) in organic sunflower oil for an easier dispersion into the finished product.

- ✓ From 1 to 5% in the oily phase of emulsions and make-up products
- ✓ From 0.5% to 2.5% in the oily phase of solid soaps.
